

abbexa

In April 2013, Abbexa was first established. Since then, our product catalogue has grown each year, providing the scientific community with primary antibodies, secondary antibodies, proteins, ELISA kits and enzymes, as well as other tools for use in research.

Abbexa's headquarters house a modern laboratory and offers more than 300,000 high-quality biological tools. We pride ourselves in our company values and have always focused on continuous development and improvement. As of 2023, Abbexa has expanded internationally with branches in Houston, USA and in Leiden, The Netherlands, to serve the scientific community worldwide.

You are at the centre of what we do and we will keep offering unrivalled expertise and outstanding quality laboratory products to support your research and provide reliable and reproducible results in each stage of the process.

What we have accomplished in our first 10 years would have not been possible without your ongoing support - and we are just getting started. Here's to what's next.
