

GVS Biodust Mask - Biohazard Respiratory protection

Filtering face mask as PPE in III category protects against biological agents in groups 2 and 3 (Encl. III, EC Directive 54/2000) such as: HIV, HCV, HBV, Bse/Tse, Avian Flu, Anthrax and any biological agents (bacteria and viruses) in the workplace. Certified as PPE in III category in compliance with EN149:2001 + A1:2009.

The most important specifications are:
Adjustable rubber band, plaster, special filter media hydrophobic filter media and different sizes (SM/ML) to fit to different type of faces and for better adhesion, available with or without valve.

Code	Description
SFM00301SM	GVS Biodust Mask without valve
SFM00301ML	GVS Biodust Mask without valve
SFM00301SMV	GVS Biodust Mask with valve
SFM00301MLV	GVS Biodust Mask with valve
